

Laptop Request Approval Flow - Project Documentation

Project Title

Laptop Request Approval Management System using ServiceNow Flow Designer

1. Project Overview

The Laptop Request Approval Management System automates the process of requesting, approving, and provisioning laptops for employees.

The solution uses ServiceNow Flow Designer to:

- Accept laptop requests from users
 - Route requests for approval
 - Notify users through email
 - Reduce manual work and approval delays
-

Development Milestones

Milestone 1: Application Creation

Step 1.1 Open Studio

Navigate: All → Servicenow Studio

Step 1.2 Create Application

1. Click: Create Application

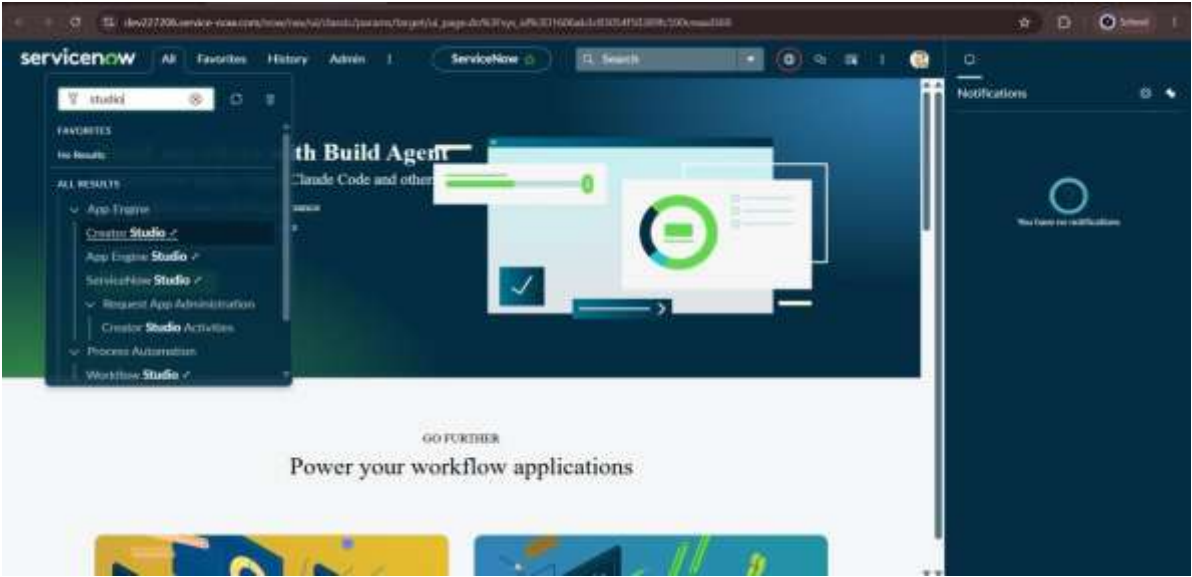

2. Enter:

Application Name : Laptop Request Management

3. Click: Create

Deliverable

Custom ServiceNow application created successfully.

Milestone 2: Database Design

Step 2.1 Create Custom Table

Table Name:

Laptop Request

Fields

Field Name	Type
Request Number	Auto Number
Employee Name	Reference (User)
Laptop Type	Choice
Justification	String
Approval Status	Choice
Task Status	Choice
Delivery Date	Date

Deliverable

Laptop Request table created.

Column label	Column name	Type	Reference	Max length	Default value	Display	Updated
Request Number	number	String		40	javascript:global.getN...	☒	2026-06-22 03:21:33
Task Status	task_status	Choice				☒	2026-06-22 03:09:15
cost	cost	Integer				☒	2026-06-22 03:09:16
Approval Status	approval_status	Choice				☒	2026-06-22 03:09:11
Updates	sys_mod_count	Integer				☒	2026-06-22 03:09:15
Updated	sys_updated_on	Date/Time				☒	2026-06-22 03:09:15
Requested For	requested_for	Reference	User			☒	2026-06-22 03:09:14
Delivery date	delivery_date	Date/Time				☒	2026-06-22 03:09:13
Updated by	sys_updated_by	String		40		☒	2026-06-22 03:09:15
Laptop Type	laptop_type	Choice				☒	2026-06-22 03:09:13
request number	request_number	String		40		☒	2026-06-22 03:09:16
Created	sys_created_on	Date/Time				☒	2026-06-22 03:09:12

Milestone 3: Service Catalog Development

Step 3.1 Create Catalog Item

Navigate:

Service Catalog → Maintain Items

1. Click: New

2. Create Catalog Item Name

Laptop Request

Variables

Laptop Type

3. Type:

Select Box

Choices:

- Developer Laptop
- Testing Laptop
- Business Laptop
- High Performance Laptop

Justification:

Type: Multi Line Text

Deliverable

Laptop Request Catalog Item created.

The screenshot shows the ServiceNow interface for creating a new Catalog Item. The top navigation bar includes 'All', 'Favorites', 'History', and 'Workspaces'. The main header is 'Catalog Item - Laptop Request'. Below the header, there's a message: 'You are editing a record in the Laptop Request Management application (unpublished)'. A blue box provides instructions: 'Catalog items are goods or services available to order from the service catalog. Items can be anything from hardware, like laptops and phones, to software applications, to furniture and office supplies. Enter a Name and Short description to display for the item. Enter a Price, approvals, variables, and other information as needed.' The form fields include: 'Name' (Laptop Request), 'Application' (Laptop Request Management), 'Catalogs' (Service Catalog), 'Category' (Hardware), 'State' (None), 'Checked out' (None), 'Owner' (System Administrator), 'Active' (checked), and 'Fulfillment automation level' (Semi-automated). Below the form, there are tabs for 'Item Details', 'Process Engine', 'Picture', 'Pricing', and 'Portal Settings'. The 'Item Details' tab is active, showing a 'Short description' field and a 'Description' field with a rich text editor.

Milestone 4: Flow Designer Configuration

Step 4.1 Create Flow

Navigate:

1. Flow Designer
2. Click: New Flow
3. low Name: Laptop Request

Step 4.2 Add Trigger

1. Click: Add Trigger
 - Select: Service Catalog
 - Select: Catalog Item Requested
2. Choose: Laptop Request
3. Save

Deliverable

Flow starts automatically when a Laptop Request is submit

The screenshot shows the ServiceNow Workflow Studio interface. The top navigation bar includes 'Workflow Studio'. The main header is 'Laptop Request Approval Flow'. Below the header, there's a message: 'Laptop Request Approval Flow is unpublished'. The flow is currently 'Inactive'. The 'TRIGGER' section shows a 'Service Catalog' trigger. The 'Data' section shows a table with columns: 'Requested Item Record', 'Record', 'Run Start Date', 'Queue/Time', 'Task Name', 'Table Name', and 'Run Start Date Price'. The 'Advanced Options' button is visible.

Milestone 5: Approval Process

Step 5.1 Add Approval Action

1. Click +

Choose: Action

Search: Ask For

Approval Select: Ask

For Approval

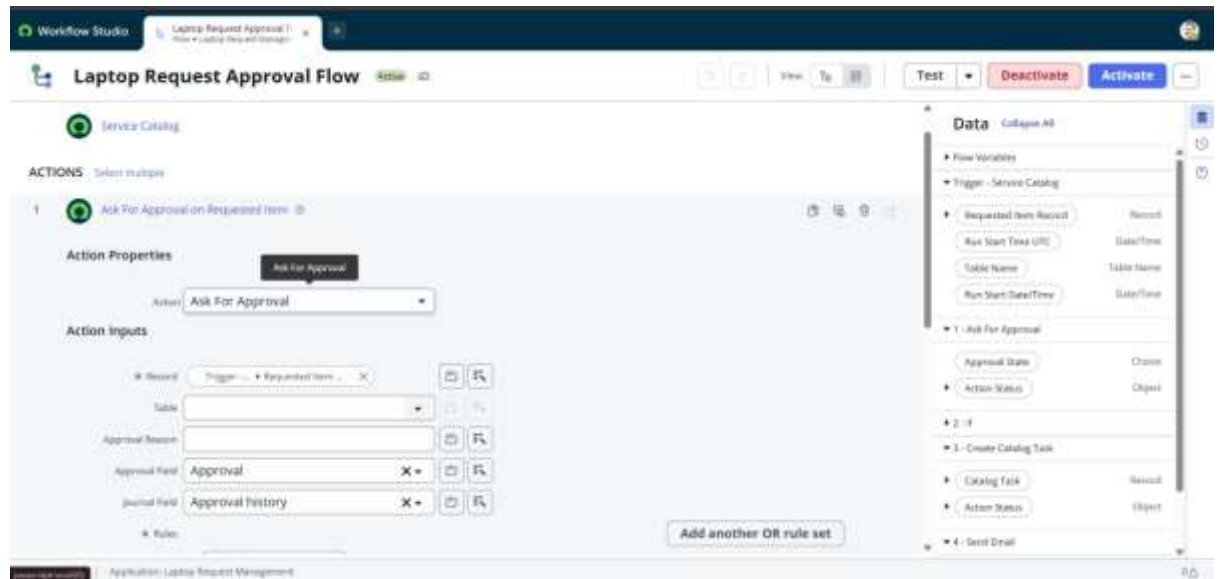

Step 5.2 Configure Approval

2. Approval Rule: Users

Approver: Requested For → Manager

Deliverable

Manager receives approval request automatically.

Milestone 6: Approval Decision Logic

Step 6.1 Add IF Condition

1. Click +

Choose: Flow Logic

Select: If

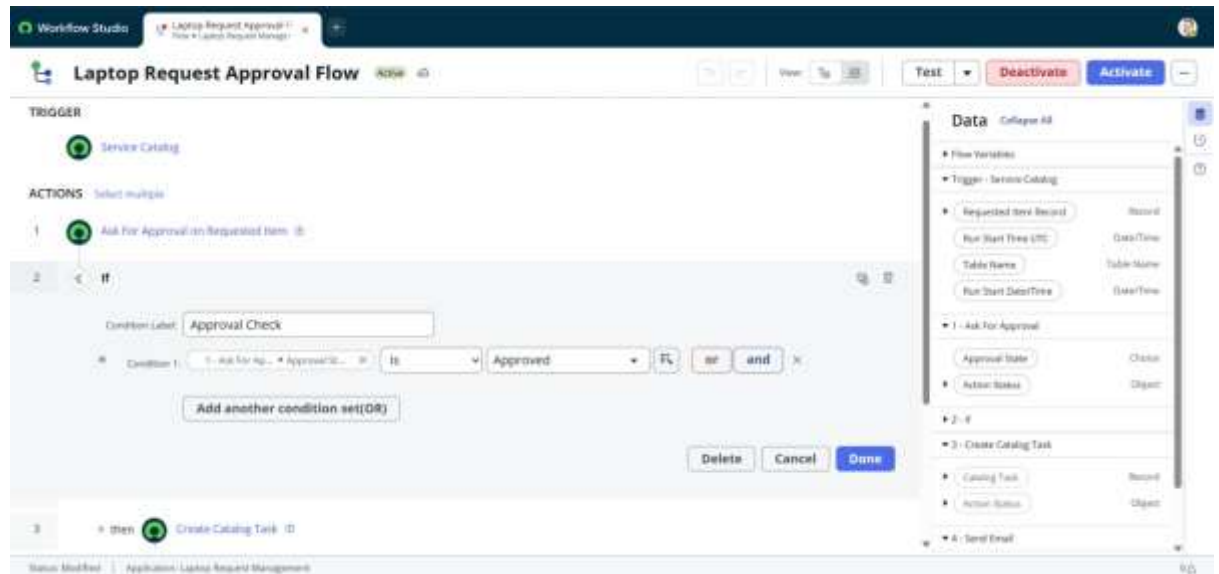

Step 6.2 Configure Condition

Condition Label: Approval Check

Condition: Approval State is Approved

Deliverable

Flow checks whether request is approved.

Milestone 7: Task Creation

1. Approved Path

Click : Action

Search: Create Catalog Task

Configure:

2.Short Description:

laptop approval

3.Description:

Approved Employee will be provided by Laptop.

4.State: Open

Deliverable

Catalog Task generated automatically.

Milestone 8: Rejection Handling

Rejected Path

1. Click +:Action

2. Search:

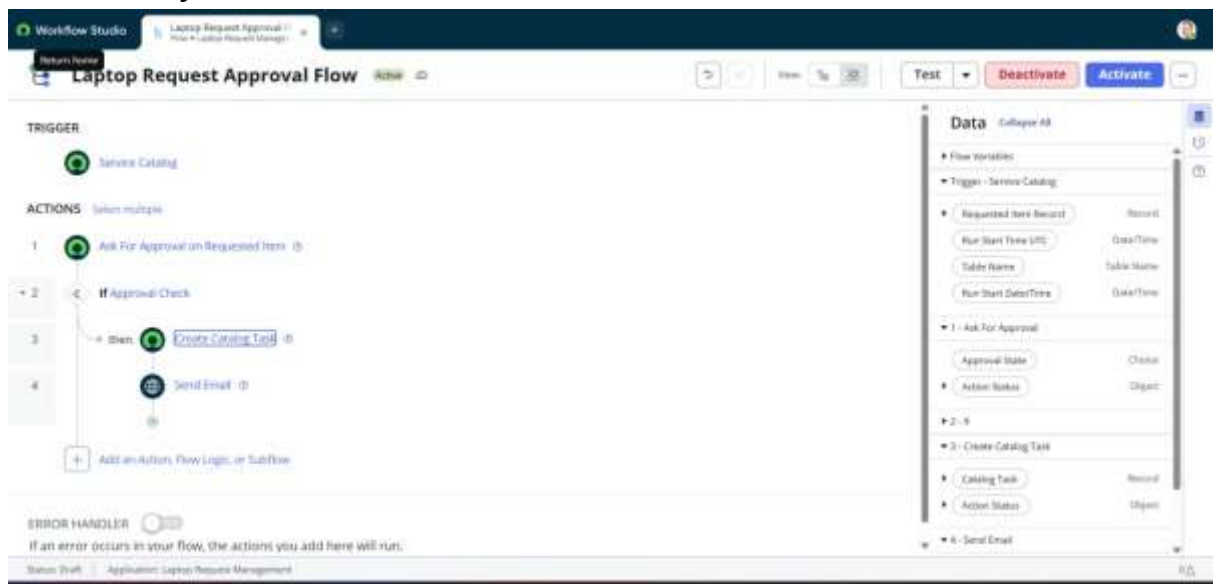

Send Email

Email Message:

Your laptop request has been rejected by the approver.

Deliverable

Automatic rejection notification sent.

Milestone 10: Notifications

Request Submitted

Your laptop request has been received.

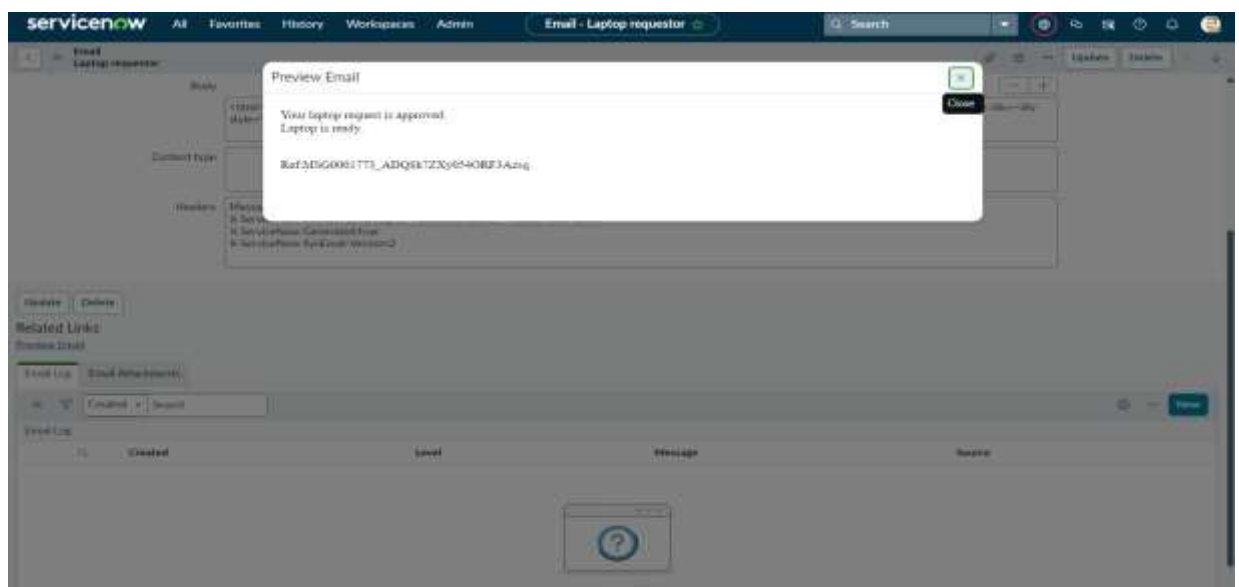

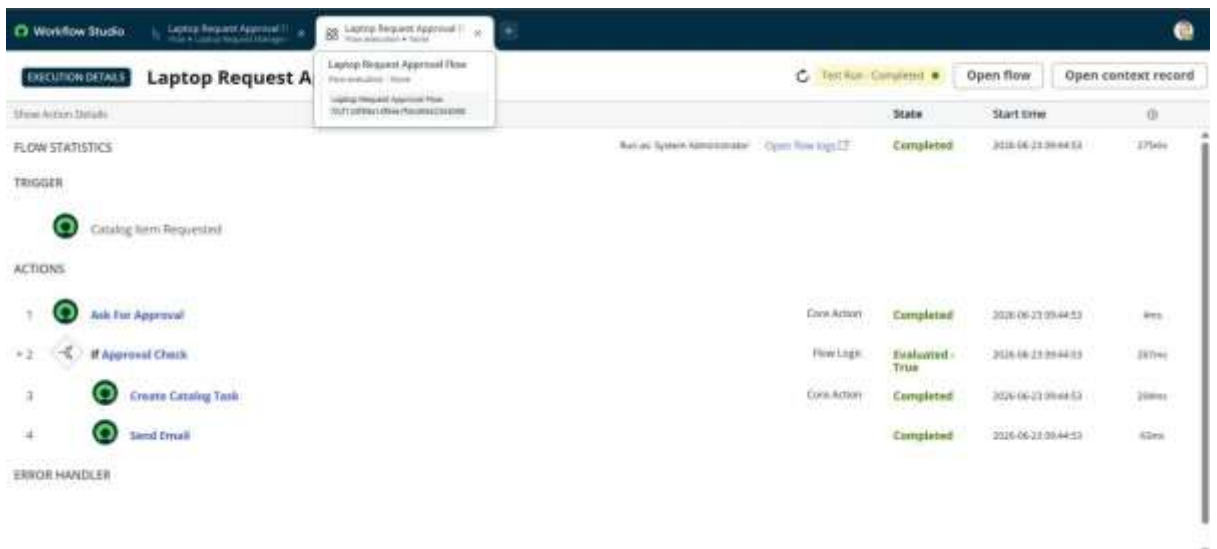

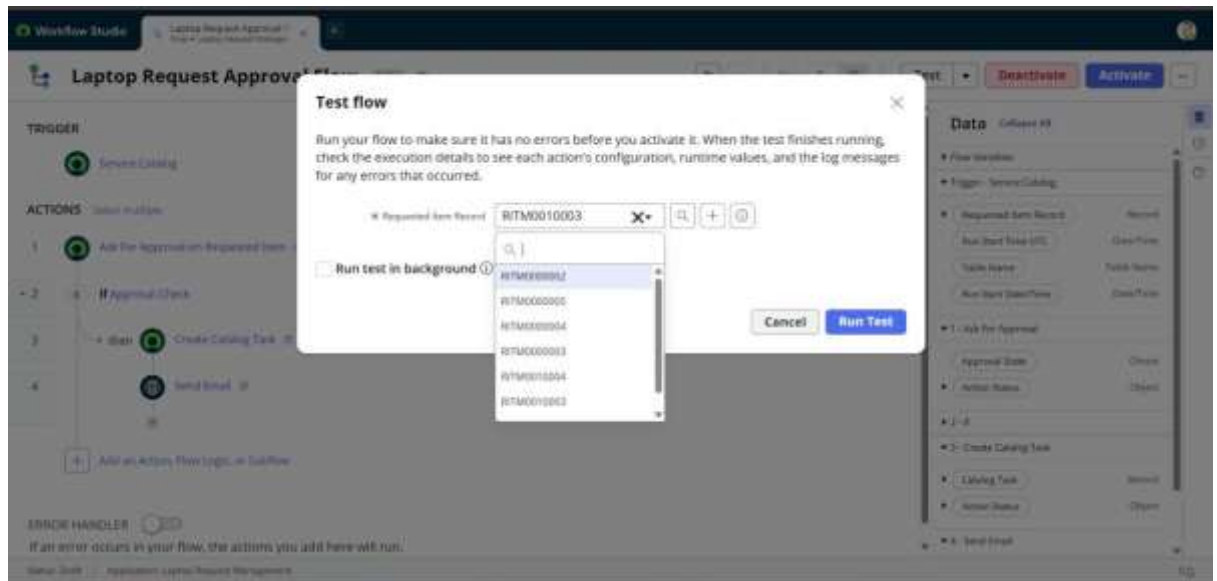

Request Approved

Your laptop request has been approved.

Laptop Delivered

Your laptop has been delivered.

Deliverable

Conclusion

The AI-Powered Laptop Request Management application successfully automates the end-to-end laptop request process using ServiceNow Service Catalog and Flow Designer. The solution improves efficiency, reduces manual intervention, and demonstrates practical implementation of AI concepts such as recommendation systems, automated approvals, intelligent task assignment, and predictive delivery estimation.
